

CN3 bending ring load cell

product description

The CN3 is a compression load cell with a bending ring design. It delivers high-accuracy measurements across a wide range of high-capacity models.

It is constructed from stainless steel and is fully welded to ensure complete environmental protection. It has a compact and low-profile design.

Certified to both OIML and NTEP requirements, the CN3 is an ideal choice for trade-approved applications, such as tanks, silos and high-capacity platform scales. ATEX approval is pending, and assures that the CN3 is a safe and reliable choice for use in explosive and volatile environments.

The CN3 comes preconfigured and assembled in custom mounting to ensure optimum performance. Alternatively, the load cell is available without the mount.
